

# Tower and desktop storage enclosures

## RUGGED, RELIABLE, AND SCALABLE PRO STORAGE

CRU® RTX® tower and desktop enclosures are relied upon by professional and aspiring photographers and videographers, businesses, and enterprise IT because they offer a powerful storage solution. Because RTX units offer quick access to bare hard drives, it's easy to transport data and grow or scale a storage operation over time as demand shifts. Additionally, RTX units can be configured as RAID storage, creating multiple backups simultaneously.

## RTX IS TRUSTED BY CREATIVE PROFESSIONALS AND BUSINESSES

Rugged tower enclosures range from 1 to 8 bays of removable storage designed for easy transportation of large data sets.

**Applications:** data security, disk-to-disk backup, digital media editing and storage, archiving, portable data

**Core markets:** photography, video, SMB, government, forensics, SOHO, departmental computing

# RTX enclosures are versatile and powerful

Our enclosures are built to last, with frames, carriers, and connectors rated for tens of thousands of insertion/removal cycles.

Designed with an all-metal construction, high-quality components, up to 6 Gbps throughput, and shock-mounted drive bays, CRU manufactures industry standard devices for large-volume data security, ingestion, transport, and backup.

With multitudes of form factors and interfaces, high speeds, RAID or JBOD configurations, and encryption, CRU has a storage solution for your needs.

## There's an RTX enclosure for every situation

### **RTX220-3QR**

Prized for its rugged design and impressive performance, the RTX220-3QR is popular with creative professionals looking for reliable RAID storage.

### **RTX110-3Q**

CRU offers RTX 1-bay units that are compatible with our DataPort® DP10, Data Express® DX115, and Rhino® Jr 34S removable drive carriers.

### **RTX430-3QR**

RTX 4-bay units like the RTX430-3QR can be purchased as RAID or JBOD storage. The 430-3QR is a RAID tower that ingests 4 3.5" hard drives and connects via USB 3.0.
